

Rajib Sahoo

Lead Software Engineer

Bangalore, Karnataka, India · +91 7207374027 · rajibborn2win@gmail.com · linkedin.com/in/rajibksahoo

SUMMARY

Lead Software Engineer with 12+ years of experience designing high-scale distributed backend systems for global banking and financial services. Expertise in Java 21, Spring Boot, Microservices, Kafka, GraphQL, and cloud-native architecture. Experienced in leading end-to-end delivery of enterprise lending platforms while driving API governance, engineering standards, and AI-assisted software development using LLMs, RAG, and Spring AI.

EXPERIENCE

Lead Software Engineer, Sberbank India

08/2024 - Present

Bangalore, India

- Architected and delivered a high-scale corporate lending platform covering the complete credit lifecycle, including contract orchestration, interest accrual, NPA provisioning, and bill discounting.
- Built an event-driven microservices ecosystem using Java 21, Spring Boot 3, and Kafka, with automated deployments to OpenShift using Helm.
- Established API-first standards across the lending division by designing and governing GraphQL and REST APIs, improving consistency, scalability, and developer productivity.
- Integrated LLM-based developer tooling using Spring AI and RAG techniques to improve engineering productivity and accelerate enterprise code understanding.

Technical Lead, Standard Chartered

03/2018 - 08/2024

Bangalore, India

- Owned the architecture and end-to-end delivery of the NG Trade Invoice Financing platform using scalable microservices and event-driven workflows.
- Engineered high-throughput distributed systems with Spring Boot, Kafka, and GraphQL/REST APIs to deliver reliable and scalable transaction processing.
- Drove technical design decisions, established API standards, and mentored engineers to improve system resilience, maintainability, and consistency.

Java Developer, Mindtree

03/2017 - 03/2018

Bangalore, India

- Built and maintained RESTful microservices using Java 8 and Spring Boot for an insurance-domain platform.
- Implemented persistence with Spring Data JPA / Hibernate over Oracle, and wrote unit and integration tests with JUnit and Mockito.
- Leveraged Java 8 streams, lambdas, and the Collections framework to refactor legacy modules for readability and performance.

System Engineer, Tata Consultancy Services

02/2014 - 03/2017

Hyderabad, India

- Developed enterprise Java web applications using Spring MVC, Hibernate, and JSP/Servlets on Tomcat, delivered with Maven, for a telecommunications-domain system.
- Designed and consumed REST APIs backed by DB2 with hand-tuned SQL.
- Worked across the full SDLC (design, development, testing, and production support), consistently delivering against tight release deadlines.

SKILLS

Languages:	Java, SQL
Frameworks & APIs:	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, Microservices, REST APIs, GraphQL, OAuth2, JWT
Distributed & Messaging:	Distributed Systems, Event-Driven Architecture, Apache Kafka, Distributed Transactions, Saga Pattern, Resilience4j
Data:	PostgreSQL, Oracle, DB2 (RDBMS), Redis, Hazelcast (NoSQL / Distributed Cache)
Cloud & DevOps:	AWS, Docker, Kubernetes, OpenShift, Helm, CI/CD
Observability:	Prometheus, Grafana, OpenTelemetry
AI / LLM:	LLM Integration, RAG, Spring AI, LangChain4j, MCP, AI-Augmented Development
Architecture & Engineering:	System Design, Distributed Architecture, Cloud-Native Architecture, Object-Oriented Design (OOD), Design Principles & Patterns, Performance Optimization, BDD / Cucumber, Agile

EDUCATION

B.Tech, Electronics & Telecommunications, Biju Patnaik University of Technology, Bhubaneswar | 2009-2013

CERTIFICATIONS

Oracle Certified Professional, Java · Certified Kubernetes Application Developer (CKAD) / Certified Kubernetes Administrator (CKA)

ACHIEVEMENTS

- Past Vice President of Education, Standard Chartered Toastmasters Club

LANGUAGES

English · Hindi
