

Rajib Sahoo

Senior Software Engineer

Bangalore, Karnataka, India · +91 7207374027 · rajibborn2win@gmail.com · linkedin.com/in/rajibksahoo

SUMMARY

Senior Software Engineer with 12+ years building high-scale, event-driven distributed systems for global banks. Deep expertise in Java, Spring Boot, Kafka and cloud-native microservices on Kubernetes/OpenShift. Hands-on with LLM-powered and Agentic AI workflows: RAG pipelines, MCP-based tool integration, and JVM-native AI orchestration (Spring AI / LangChain4j). Focused on resilient, observable financial-services platforms delivered from design through production.

EXPERIENCE

Senior Software Engineer, Sberbank India

08/2024 - Present

Bangalore, India

- Architected an event-driven corporate lending platform covering the full credit lifecycle (contract orchestration, interest accrual, NPA provisioning, bill discounting) on Java 21, Spring Boot 3 and Kafka, deployed via Helm on OpenShift.
- Processes ~1,000 transactions/day across 6 microservices; established API-First (GraphQL/REST) and design-pattern standards across the lending division.
- Mentored 4 engineers.

Technical Lead, Standard Chartered

03/2018 - 08/2024

Bangalore, India

- Owned architecture and delivery of NG Trade Invoice Financing using scalable microservices and event-driven workflows (Spring Boot, Kafka, GraphQL/REST) for high-throughput transaction processing.
- Built a 26-class validation framework (input/database/API validators, MapStruct) and drove resilience and API-consistency standards.
- [EXAMPLE, replace with a real metric: cut release-validation defects by ~35% across 10+ services].

Java Developer, Mindtree

03/2017 - 03/2018

Bangalore, India

- Built and maintained RESTful microservices using Java 8 and Spring Boot for an insurance-domain platform.
- Implemented persistence with Spring Data JPA / Hibernate over Oracle, and wrote unit and integration tests with JUnit and Mockito.
- Leveraged Java 8 streams, lambdas and the Collections framework to refactor legacy modules for readability and performance.

System Engineer, Tata Consultancy Services

02/2014 - 03/2017

Hyderabad, India

- Developed enterprise Java web applications using Spring MVC, Hibernate and JSP/Servlets on Tomcat, delivered with Maven, for a telecommunications-domain system.
- Designed and consumed REST APIs backed by DB2 with hand-tuned SQL.
- Worked across the full SDLC (design, development, testing and production support), consistently delivering against tight release deadlines.

SKILLS

Languages:	Java, SQL
Frameworks & APIs:	Spring Boot, Microservices, REST APIs, GraphQL
Distributed & Messaging:	Distributed Systems, Event-Driven Architecture, Apache Kafka, Resilience4j
Data:	PostgreSQL, Oracle, DB2 (RDBMS), Redis, Hazelcast (NoSQL / distributed cache)
Cloud & DevOps:	AWS, Kubernetes, OpenShift, Helm, Docker, CI/CD
Observability:	Prometheus, Grafana, OpenTelemetry
AI / LLM:	LLM Integration, RAG, MCP, Spring AI / LangChain4j, AI-Augmented Development
Engineering & Practices:	Design Principles & Patterns, OOD, System Design, BDD / Cucumber, Agile

EDUCATION

B.Tech, Electronics & Telecommunications, Biju Patnaik University of Technology, Bhubaneswar | 2009-2013

CERTIFICATIONS

Claude 101 · Claude Code in Action

ACHIEVEMENTS

- Past Vice President of Education, Standard Chartered Toastmasters Club
